

Interested in getting a quote?

I will be glad to help you in any way I can, but before contacting me please keep a few things in mind...

I am only one person, so I take commissions on a first come, first serve basis. If you needed it done yesterday, there are a lot of large, mass production companies who can better serve you. Not that I want to turn anyone away, but I do want to have the time to do things right and give each of my customers the attention and quality they deserve.

Please be as detailed as possible! Think carefully of what exactly it is you want. Sizes, colors, media, etc. are very important and sometimes affect pricing greatly. What will it be used for? Where do you plan to use it? What materials will be needed to complete the job? Will you need a permit? The more prepared you are, I can give a more accurate quote up front and finish the job faster. It doesn't do either of us any good for me to put a lot of time and effort into a project only to have to overhaul or abandon it completely due to major changes or prohibitive costs.

On the other hand, I have no problem helping someone develop an idea - such as a new logo - in which case may not be a specific idea. I can still provide a rough estimate and several proofs before production as long as communication stays open and important details are relayed as they arise.

I do ask for a down payment, or complete payment up front depending on the type of work. References are available upon request. If you haven't already, please visit my Gallery to see my work.
